I just want voice my opinion on the limitations you are trying to impliment on X-M Radio. X-M is probably the best thing to happen to radio scince it was invented. You get what you want when you want it and as long as we are paying for the service they should be able to broadcast whatever they think the public wants to hear. Let the paying customers decide what is aired on X-M. Not a bunch of high paid lobbyists and land based radio stations that spend too much airtime on commercials and music they think we should listen to. We finally have the freedom to listen to what we want without commercials every three minutes. Leave this broadcasting company alone, please!
